

With regard to proceeding 04-405, the precedents that are being set that help the "rich get richer" are hurting our country. Commissions like the FCC are supposed to be "for the people." The ability of big businesses to currently push around regulatory and government bodies is embarrassing.

Local businesses are the flavor of the US and it is the "little guy" who should be favored, not the bully. Currently, there is an unfortunate unwritten rule that says, "it is okay to be unethical, inhumane and myopic as long as money and power are gained."

It is long over due for agencies like the FCC to create a level playing field so that we don't have to live in McUSA. Please, deny and reverse the current consolidation of communication in the US, our country depends on it. Thank You.
